## PROFESSIONAL SUMMARY

A task-driven full stack web developer looking forward to work in user-centric product company. Excellent debugging ability and problem-solving skills and work better in a team-environment. Seeking to apply my skills in a professional setting, preferably in product development role.

## PROJECTS

[REVV CARS, CLONE](#) |

### [Introduction](#)

Revv is India's best and most trusted traveling facility provider website, which has helped millions in needs.

### [Features:](#)

- Sign-in/Sign-up user authentication
- Car's page: Integrated search filter with filterization and pagination.
- FAQ page
- Card detail page for each fundraiser
- Payment page

[Tech Stack](#): Chakra UI | React | JavaScript | Redux | CSS

### [Areas of responsibility:](#)

- Created a static FAQ with dropdown functionality.
- Created Car's product page where I applied basic user interface and applied sort as well as filter functionality according to their price.

A collaborative project created by a team of 5 developer in a week.

[VEDIX, CLONE](#) |

### [Introduction](#)

Vedix is a customized ayurvedic hair care regimen that offers ayurvedic anti-hair loss products.

### [Features:](#)

- Sign-in/Sign-up user authentication
- API for data
- Responsive design
- Functionality: search, sort, filter, add to cart and remove to cart

[Tech Stack](#): HTML | CSS | JavaScript | DOM

### [Areas of responsibility:](#)

- Created a static (science page, which also contains 2 pages and a pricing page) and dynamic page (shipping method page) which have functionality like fetch personal details of user from previous page and send it to next page.
- For running this project, you need to run server manually by giving command => npm run server
- Then json server will start on port 3001, just check and now you can run functionality of this clone website

A collaborative project created by a team of 6 developer in a week.
